

## Solar & Low Power Displays

Because the solar panels generate power wherever its needed, the stops are easy to set up anywhere - there's no need for a connection to mains power and they cost nothing to run.

Trueform have already installed thousands of solar powered bus stops and the robust systems are proven to work in all weather conditions.

Trueform's solar systems optimise performance, latest technologies, build quality and durability in stylish contemporary housings and at a competitive cost - thus providing high return on investment
