trueform

College & University Campus Digital Cycle Counters, Cycle Shelters & Storage

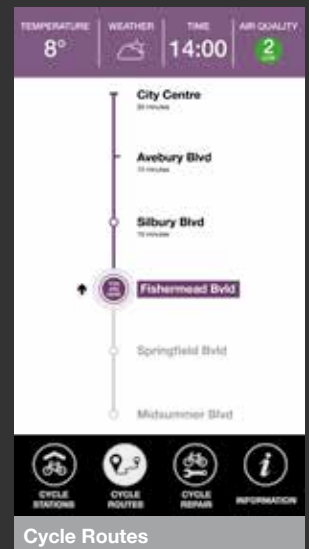

Our smart Digital Cycle Counters feature the very latest counting and display technology, they provide real-time updates of cycling and walking usage.

The Cycle Counters collect and display information in the form of daily and cumulative counts of cyclists and pedestrians, a smart way to promote cycling and walking around campus and to encourage a healthier lifestyle.

Digital cycle counters help to promote active travel leading to an increase in cycling and walking catchment of an urban area. This has benefits in terms of safety, as even greater numbers of people travel without their vehicles.

Optional interactive digital display screen is the perfect platform for additional information, wayfinding mapping and advertising.
