

3 Line Next Train Indicator

The 3 Line LED Next Train Indicator has been specifically designed to display real-time next train information to passengers on railway platforms with and integrated clock. Using the same design as the full sized 5mm LED version, this reduced size NTI is ideal for smaller stations or locations where the installation of a standard NTI would not be possible.

Key Product Features

- 3 Lines with 32 characters per line
- Aluminium enclosure with polycarbonate or laminated safety glass front screen, anti-reflective surface treatment.
- Single sided or double sided versions available
- Amber clear ultra-bright or diffused super-bright LEDs allow daylight viewing.
- Automatic brightness adjustment
- Tough all-weather construction manufactured to IP65, impact rating IK7
- An HH:MM:SS clock in 39mm format is available.
- A bespoke design service is available for all mounting and installation locations.
- Environmental control including impact detection and diagnostic control.
- Single sided dimensions: 1066mm(L) x 393mm(H) x 178mm(D)
- Double sided dimensions: 1066mm(L) x 393mm(H) x 296mm(D)
