

Solar Countdown LED Flag

Specifically designed for out of town locations where provision of power is an expensive and challenging problem.

The Ferrograph renewable energy LED Countdown flag is a discrete numeral LED display. Each service indicator tile has a two digit LED countdown display which indicates the number of minutes until departure

Communication is via GPRS to provide real time information.

Key Product Features

- 3, 6 or 9 segment service display options
- Single sided
- 30mm capital character height
- Retrofit to existing flag posts is possible via bespoke mounting kit.
