

# The UK's Leading Manufacturer of EV Chargers

Reducing the Carbon Footprint in the  
Manufacture and Deployment of EV Chargers

Bronze Partner

Medium Enterprise Partner

# The dedicated EV charger manufacturing division of the Trueform Group

## Reducing the carbon footprint in the manufacture and deployment of EV chargers.

Truecharge is part of the Trueform Manufacturing & Technology Group, one of the UK's leading manufacturing & technologies companies. Established over 50 years, Trueform specialise in the design, manufacture and assembly of EV Chargers and roadside infrastructure technology. Our Truecharge charge points embody our commitment to reliable, high-performance AC charging. All of our chargers are British Standard, OCPP & PAS 1899 compliant and feature an optional integrated contactless payment terminal.

Utilising innovative design, engineering, charger technology and advanced manufacturing techniques, Trueform has provided over 150,000 products at premium locations in major cities throughout the UK and the rest of the World.

### Our customers include:

- **Charge Point Operators**
- **Local Authorities, Councils, & Cities**
- **EV Charge point installers**
- **Transport and Highways Authorities**
- **Companies, private and commercial**
- **Those looking to achieve genuine Environmental, Social, Governance status (ESG) in EV charger procurement and deployment**

## Custom Manufacturing for EV Charging Units & Infrastructure

Truecharge's EV hardware solutions are supported by comprehensive field services, including installation, logistics, commissioning, project management, maintenance and remote monitoring. Our fully integrated chargepoint housings are manufactured for dual or single socket installations.

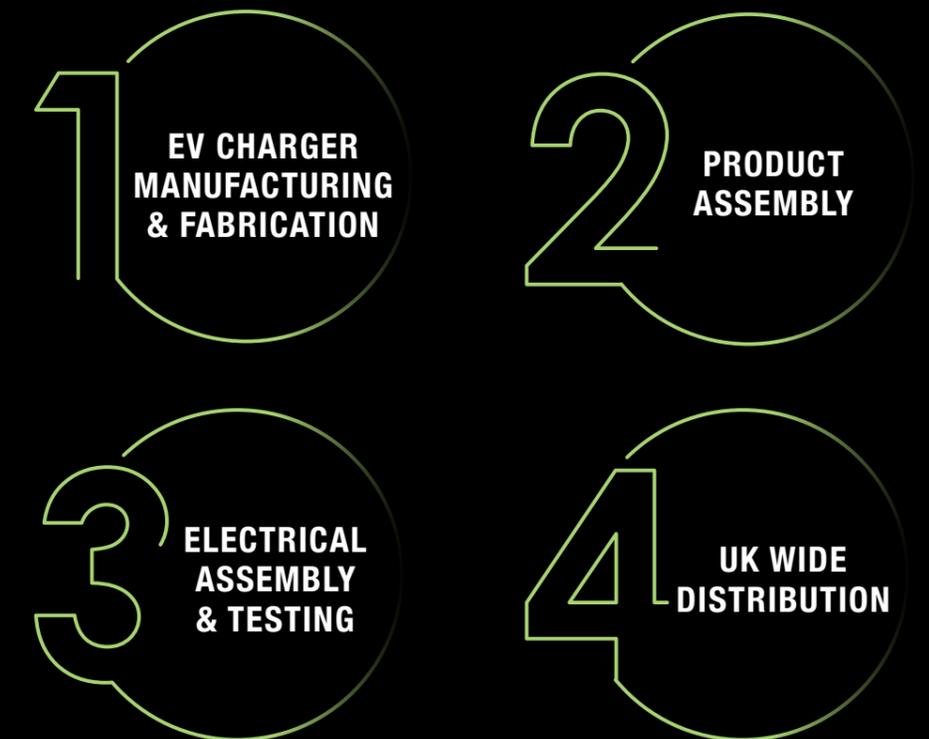

## End-to-end charger production & deployment

From design and fabrication to electronics assembly and nationwide deployment, Truecharge delivers a full-service UK-based solution.

Our charging units are produced in-house, quality tested, and delivered to site as ready-to-deploy systems.

# Support services if required

## PRODUCT INSTALLATION SERVICES

- Groundwork's and Civils
- Concrete foundation works
- Site survey (intrusive and non-intrusive)
- Installation & Erection
- Finished floor reinstatement
- Site management & supervision
- Charger diagnostics, firmware updates, and contactless payment terminal servicing

## STREETWORKS SERVICES

- Traffic management services (NRSWA Certified)
- NRSWA Opening Notices
- Utility stat plans
- Electrical connection & testing services (Lloyds NERS Accredited)
- Groundworks and finished floor reinstatement

# Benefits of manufacturing your EV chargers in the UK

Not only is it a highly cost effective supply chain choice, products manufactured in the UK, for the UK market, are being chosen by ethically and environmentally conscious companies.

Research has shown that most UK clients show significant preference to EV charge products manufactured and assembled in the UK when making decisions about their choice of charge operator.

## 1 REDUCED MANUFACTURING COSTS

Manufacturing & assembly in the UK can offer significant cost reductions.

## 2 REDUCED DELIVERY COSTS

No shipping, import duties or customs clearance charges.

## 3 REDUCED CARBON FOOTPRINT

Delivery within the UK, significant reduced carbon footprint in both manufacture & delivery. The fewer miles your products clock up on their way to you, the less harm they are doing to the planet.

## 4 QUICKER LEAD TIMES

No lengthy shipping / transportation periods.

## 5 LESS RISK IN THE SUPPLY CHAIN

No nasty surprises resulting from exchange rates.

## 6 ABILITY TO SEE PRODUCTION IN PERSON

Flexibility and the ability to react quickly at every stage of the process.

## 7 BETTER COMMUNICATION

Simple communication channels with no language barrier.

# Why choose Truecharge?

**Truecharge are one of the UK's leading manufacturing and technologies companies.**

Truecharge is part of the Trueform Manufacturing & Technology Group, one of the UK's leading manufacturing & technologies companies. Established over 50 years, Trueform specialise in the design, manufacture and assembly of EV Chargers and roadside infrastructure technology. Our products are manufactured in house, within our UK based manufacturing and technology centre.

Utilising innovative design, engineering, charger technology and advanced manufacturing techniques, Trueform has provided over 150,000 products at premium locations in major cities throughout the UK and the rest of the World.

Our mission - to provide the infrastructure needed for the World's transition to sustainable mobility

To harness the very best of design, innovation, technology, advanced manufacturing and engineering to create award winning product and technology solutions that promote and facilitate low carbon mobility solutions that reduce carbon emissions, improve air quality and protect the environment.

Truecharge are a leading ESG company (Environmental, Social and Governance). Truecharge's green street infrastructure products assist organisations achieve ESG - the three central factors in measuring sustainability and societal impact.

Truecharge's comprehensive in-house engineering and manufacturing facilities enables the timely, cost-effective production to suit any client requirements. Over the years Truecharge have provided award winning products and structures for a wide range of applications.

Our many years of experience enables us to provide high quality products that are robust, vandal resistant and cost effective to install and maintain.

Whatever the level of support required, Truecharge can help with our range of services for the design and/or manufacture of bespoke product solutions. Truecharge's experts will work with you to engineer a solution which meets your aesthetic, functional, performance and cost requirements.

Truecharge believe strongly in social value. We provide products that support local communities to improve economic, social and environmental wellbeing through enhancements in, zero carbon mobility, public transportation, active travel and community engagement. We are partners with Woodland Trust, Crisis and Sustrans.

## Supporting Grant-Eligible echarge Installations

Truecharge products are compliant with OLEV and LEVI-aligned funding criteria. Our team helps clients integrate eligible Truecharge units into funding applications including WCS, LEVI, and EVHS schemes.

### OLEV Workplace Charging Scheme (WCS)

A grant of £350 per charger available for up to 40 charge points at commercial locations.

### OLEV Electric Vehicle Homecharge Scheme (EVHS)

A grant of £350 available for all employee home locations. Our portal solutions makes the collection of necessary data from employees simple.

## Get in touch

For hardware enquiries or to arrange a specification meeting for the our latest Charge Point offerings, contact our Truecharge division.
