A Pioneering Manufacturing & Technologies Company

**trueform**

## THE WORLD'S LEADING STREET FURNITURE SUPPLIER

Trueform have a comprehensive 'off the shelf' range of innovative street furniture designs to suit virtually all customer requirements.

Trueform's ability to blend creative new street furniture design with sound engineering expertise coupled with its hands-on installation and maintenance experience enables it to provide street furniture that are not only a powerful visual calling card for the promotion of public transport but are robust, vandal resistant and easy to maintain.

Trueform designs meet the demands of busy global cities. They are functional, comfortable, safe, modular and ecological. Each product has been individually designed and engineered to provide unrivalled customer benefits.

### **Style & Branding**

- Visual appearance to complement a variety of architectural surroundings
- High profile tool for the promotion of public transport service

### **Strength & Performance**

- Robust, vandal, graffiti and weather resistant materials and finishes
- Stainless steel, steel & aluminium construction options for lasting performance and appearance

### **Simplicity**

- Strong, modular components for fast and safe erection on site
- Ability to accept RTI displays, digital information and Journey Planning modules
- Designed to accept covert CCTV cameras within shelter body
- Future Proofed and Technology enabled
- Range of Solar power lighting systems available
- Full compliance with regulations and guidelines (DDA)

## ECO FRIENDLY, SUSTAINABLE STREET FURNITURE MADE IN THE UK

Trueform's innovative, eco street furniture is manufactured in house, within our UK based, carbon neutral, shelter manufacturing & technology centre.

Using low carbon, energy efficient materials and innovative manufacturing techniques, we ensure that our products have the lowest carbon footprint, providing significant environmental and social value benefits.

Our eco street furniture is 'Planet Marked', for approved sustainability, and use both smart and renewable technology for a minimal environmental impact.

Trueform are a leading ESG company (Environmental, Social and Governance). Trueform's eco street furniture has been assisting towns, cities and public transport authorities achieve ESG - the three central factors in measuring sustainability and societal impact.

Trueform work with their clients to 'transform cities', providing solutions that deliver a promising and sustainable future. Trueform holds ISO 14001 and PAS 2060 Carbon Neutral Certification.

Towns and cities throughout the world are using Trueform's range of low carbon, eco street furniture to facilitate and encourage low carbon mobility and active travel, whilst improving public health, air quality and quality of life.

Trueform's eco street furniture products are the most sustainable, lowest carbon, ethically manufactured products available in the industry. Trueform is the first choice for towns and cities looking to achieve the very highest ESG status.

## BESPOKE MANUFACTURING SERVICES FOR PRODUCTS & STRUCTURES

Trueform are the leading manufacturer of custom manufactured structures, including signage, street furniture, airport products, shelters, canopies, wayfinding and digital signage. Working in collaboration with architects, scheme designers, main contractors and transport authorities, Trueform has over 40 years of experience, with over 150,000 structures installed worldwide.

### Bespoke Manufacturing Services

Trueform's comprehensive in-house engineering and manufacturing facilities enables the timely, cost effective supply and installation of manufactured architectural products and structures to suit any client requirements. Over the years Trueform have provided award winning products and structures for a wide range of applications. All of Trueform's structures are fully engineered to the highest standards and can be supplied in a range of elegant, robust materials and finishes to suit individual architectural requirements and to exacting customer requirements. Our many years of experience enables us to provide high quality bespoke products that are easy and cost effective to install, erect and maintain.

## CERTIFICATIONS & QUALIFICATIONS

- Quality Management ISO 9001:2015
- Environmental Management ISO 14001:2015
- Health & Safety Management ISO 45001:2018
- Energy Management Certification - ISO 50001
- Member of Outsmart
- Member of World Out of Home Organization
- NICEIC Approved Contractor
- NERS – National Electricity Registration Scheme
- Open Reach Installation Qualified
- PlanetMark Certified Business
- Cyber Essentials
- UKCA (CE) Certified
- RoSPA
- Sentinel – Network Rail Safety Scheme
- RISQS – Railway Industry Qualification
- CSCS – Construction Skills Certification Scheme
- CHAS – Contractors Health & Safety Scheme

- Made in Britain
- Transport Supplier of the Year
- Social Value Quality Mark Bronze Accreditation

## SOCIAL VALUE

Trueform are a leading ESG company (Environmental, Social and Governance). Trueform's green street infrastructure products assist organisations achieve ESG - the three central factors in measuring sustainability and societal impact. Trueform work with clients to transform cities, providing solutions that deliver a promising and sustainable future. We are delighted to be supporting local communities to improve economic, social and environmental wellbeing through city and town centre enhancements and engagement.

Our management team leads by example: promoting active travel, enhancing health, reducing environmental impact and improving overall quality of life.

We innovate to bring new and enhancing sustainably designed products, improve technology, practices in manufacture and maintenance, evaluating and reviewing constantly.

We have enacted environment plans to achieve Net Zero, actively support local economies, provide training and education and ensure inclusivity.

We support communities through our corporate partnerships, local charities and wider volunteering initiatives including our corporate partnerships with The Bumblebee Conservation Trust, The Woodland Trust and Crisis.

## WESTFIELD LONDON

Trueform's range of interactive digital advertising displays, deployed throughout Westfield's flagship London shopping centre, were the centerpiece of the grand opening of the new £600m Phase 2 extension.

Trueform has deployed over 170 interactive digital advertising display screens & pods throughout Westfield's flagship London shopping centre at White City.

Comprising a range of 49", 55" and 75" interior and exterior digital displays in iconically designed pod housings, the new digital displays form an important part of Westfield's £600 million retail expansion that was launched in March 2018.

The extension consolidates Westfield London's position as a world-leading retail and entertainment destination, featuring the best in fashion, dining, leisure, events, services and technology with the customer experience at the heart.

## WESTFIELD STRATFORD

Following the deployment of over 170 of Trueform digital's iconic interactive advertising pods throughout Westfield's London White City shopping centre, Trueform were awarded a second major contract to provide a further 80 of its stunning digital advertising screen pods throughout Westfield's other major London shopping centre, Stratford.

Comprising 75" double sided digital displays in elegantly designed housings, complete with CCTV cameras and Trueform's smart control technology at the heart of the units, the new display pods will form an important part of Westfield's ongoing digital retail advertising expansion, consolidating Westfield's position as a world-leading retail and entertainment destination, featuring the best in fashion, dining, leisure, events, services and technology.

## LONDON STANSTED AIRPORT

In 2017, Trueform were awarded the contract to update the international departure lounge at Stansted Airport with a series of custom Flight Information Displays (FIDS), lighting features, rails, bulkheads and advertising displays. With unrivalled experience in the industry, Trueform were selected due to their full familiarity with the high standards required by an international airport, and their market leading design and manufacturing capabilities.

All of the units, each specifically designed and installed with Stansted in mind, fully conformed to the strict quality, performance and health & safety measures needed to run one of the busiest terminals in the UK. The highest grade materials and components were used to create a series of eye-catching, unique products throughout the terminal, fulfilling the architect's vision for the space.

## TRANSPORT FOR LONDON

Trueform have a highly successful, long standing track record of high quality and on-time delivery across a variety of contracts for TfL. With a relationship dating back over 30 years, Trueform have been at the forefront of TfL's transport infrastructure design and manufacture across all modes. This includes pioneering work in the deployment of bus shelters, wayfinding signage, digital displays, seating and much more, all custom designed for TfL, and built with the on-street environment in mind.

With over 50,000 assets deployed across Greater London, Trueform's work with TfL showcases a breadth of design and manufacturing experience, and the capability to adapt to a client's specific needs. In addition, the projects highlight Trueform's commitment to innovation within the public transportation, healthy streets and smart city sectors.

## JCDECAUX LONDON

Due to Trueform's unrivalled experience in both digital display manufacture and on-street installations, JCDecaux approached Trueform to produce bespoke housings for, and install, over 650 digital outdoor totems at some of the busiest and highest profile locations in London.

Given Trueform's expertise in metalwork, digital display technologies and familiarity with working on the streets of London, Trueform were the ideal choice to undertake these works. All works were successfully completed ahead of schedule, and to the highest standard.

### The scope included:

- Design and manufacture of custom housings for 1000+ 84" outdoor digital displays
- Site surveying and asset logging
- Traffic Management
- Civils/foundation works, including surface reinstatement
- Installation and commissioning of totem

## ZAHA HADID DESIGN, RIYADH

Trueform were approached to assist in the development of some unique, highly bespoke outdoor advertising MUPIs by Al Arabia Outdoor and Zaha Hadid Design.

Drawing on our expertise in the design of outdoor digital displays, we worked closely with a team of engineers and the clients to develop a fully engineered and validated display solution.

Measuring over 4.0m in height, and housed within a custom formed ductal shell (mirroring ZHD's concept), Trueform fully integrated a 3m x 2m LED outdoor display to one face, and an outdoor 75" LCD to the rear, incorporating touch screen capability. Bespoke illumination features were also incorporated, and the internal air conditioned envelope was designed in collaboration with independent cooling experts, to ensure 24/7 performance in a highly demanding environment.

## BT SMARTHUBS

Trueform have been chosen by BT to fully design, manufacture and install over 1400 enhanced 'StreetHub 2.0' units, which introduce a host of upgraded features over the existing estate, such as larger 75" outdoor advertising displays, environmental monitoring, and the ability to boost 4G/5G mobile coverage.

Expanding on an existing network of 400 StreetHubs, these units deliver a wide range of economic, social and technology benefits to communities and local councils up and down the country – from connecting local residents, businesses and visitors to free ultrafast Wi-Fi, to ensuring that people can contact the emergency services or charity helplines in times of need.

### Features include:

- 2no. High bright 75" outdoor advertising displays
- Environmental monitoring system - air quality and CO2 sensors to provide actionable environmental insights to help local councils achieve their sustainability goals, such as becoming carbon neutral by 2030
- Providing free ultra-fast Wi-Fi - 1Gbps to users within 150m of the unit. Ensuring that people can contact the emergency services or charity helplines in times of need
- Ability to boost 4G/5G mobile coverage by housing Small Cells within the unit, which boost 4G/5G signal
- Offering free phone calls, via BT's existing network, users can make calls via the interactive tablet integrated into the side of the totem, utilising their own headphones or the integrated speaker and microphone.

## INTERCONNECT, BIRMINGHAM

In 2013, Trueform were awarded the supply and installation of shelters and signage for the Birmingham City Centre Interchange and Interconnect projects. Responsible for the fabrication drawings, structural engineering, full manufacture, assembly and installation of the full product range, this project showcases an ability to successfully work with a variety of manufacturing techniques and materials, including manufacture of digital outdoor assets.

The scope of the project was to work with Centro and Birmingham City Council to manufacture and install a range of products, including:

- Bespoke bus shelters
- Area wayfinding totems
- Interchange wayfinding totems
- Digital bus stop totems

This striking, contemporary product family is a fine example of how precision engineering and manufacturing techniques can bring a vision and design concept to fruition in the public realm.

## LAS VEGAS

Trueform unveiled its innovative sinewave bus shelter for the Regional Transit Commission (RTC) outside Caesars Palace Hotel and Casino in Las Vegas. The RTC commissioned Trueform to produce shelters for installation at more than 100 sites along the famous strip.

The graffiti-proof shelters incorporate creative design and manufacturing methodology with high strength, high temperature resins to withstand the 120-degree desert temperatures in Nevada. Other innovative features include high performance solar lighting and LED advertising displays, CCTV cameras, ticket machines and state of the art electronic signage.

## SAN FRANCISCO AIRPORT

Trueform have manufactured and deployed digital signage and digital passenger information displays throughout San Francisco International Airport.

Working with the airports appointed product designers, Trueform provided a full turnkey service for the custom manufacture of a unique range of products that were specifically designed for San Francisco.

The airport serves 45 international cities on 39 international carriers. The Bay Area's largest airport, it connects non-stop with 83 cities in the U.S. on 13 domestic airlines. This contract award further consolidates Trueform's position as the global leader in airport infrastructure and passenger information signage systems.

## NEW YORK WAYFINDING

Trueform have brought the next generation of wayfinding to New York City with the contract award for the fabrication and installation of wayfinding infrastructure in Lower Manhattan, the Borough of Manhattan and New York City.

Prior to manufacture, Trueform were responsible for producing structurally checked and fully detailed 3D CAD manufacturing drawings.

This was followed by the full manufacture and installation of over 400 products across Manhattan.

This project once again demonstrates Trueform's capability in wayfinding manufacture and installation, working with complex designs, materials and environments.

## PARTICK INTERCHANGE

Trueform successfully completed the manufacture and installation of the bespoke designed passenger interchange shelters and digital signage for the prestigious Partick Bus Station Redevelopment project. The highly complex, bespoke fabricated shelters provide a premium environment for intelligent transport services. Trueform's scope of works included production drawings, engineering, fabrication, finishing, assembly and full on-site erection and commissioning.

Partick Interchange is an important integrated transport hub for West Glasgow serving one of Scotland's busiest and most densely populated areas. The £2.5million refurbishment including extensive remodelling work to integrate with the adjacent rail and subway station, the new look interchange will also incorporate into cycle and footpath networks will significantly improve the connected transport experience.

## HEATHROW AIRPORT

Trueform were responsible for the full product design, manufacture and installation of the product range of innovative signage structures at Heathrow Airport.

The design specification for these units required them to be IP65 for external installation and to have laminated bomb blast resistant safety glass and bespoke stainless steel freestanding structures.

The range of products manufactured and installed by Trueform include:

- Wayfinding Monoliths
- Flight Information Displays (FIDs)
- Illuminated Signage
- Shop Front Windows
- Glazed Pilasters
- Architectural Metalwork
- Primary and Secondary Steelwork
- Bomb Blast Proof Glazed Screens
- Bomb Blast Waiting/Smoking Shelters
- Blast Resistant Entrance Portals
- Wall mounted lights
- Post mounted lights
- Low level glazing
- Glazed gate
- Multi use posts
- Night doors

## CROSSRAIL

Trueform is proud to be an approved supplier for Transport for London (TfL). Our many projects for TfL include a comprehensive range of signage solutions, fully designed, manufactured and installed in-house.

Trueform were awarded the contract to supply signage and shelters for London's newly-constructed Crossrail transport network. This project produced a range of high-quality transport signs, each bearing the TfL logo and style.

London's transport signage has become an iconic part of the city. Trueform understands the world-renowned status of TfL's signs, using only the highest quality fabrications to produce leading signage for TfL's new Crossrail project.

## TORONTO WAYFINDING

In 2009, the City of Toronto approved the “City’s walking Strategy” which aims to create an environment where walking is an appealing, convenient, safe and stimulating experience for residents and visitors.

The scope of this program consisted of a family of wayfinding assets, including totems and finger posts, totalling in excess of 200 products on-street.

This scheme of iconic street furniture successfully accomplished the client’s goals, by actively increasing walking in the city.

### Some of the striking design features that help set these items apart are:

- Unique foundation design without cover plates to obstruct the base
- Tapered totems to allow wheelchair access directly up to the totems
- Brail lettering on all totems
- Unique, intuitive mapping system

## CROXLEY PARK WAYFINDING

Trueform collaborated with renowned wayfinding designer Endpoint in the development of this unique family of products, and completed the manufacture and installation of over fifty assets across Croxley Park.

This included large scale entrance totems, a range of directional and directory totems and wall mounted signage. The design incorporated timber-effect cladding, and custom LED 'halo' illumination to create an iconic wayfinding system.

## HONG KONG WAYFINDING

Trueform, in collaboration with UK's Transport for London, was invited to deliver an on-street pedestrian wayfinding pilot to help kick-start Hong Kong's ambitious walking initiative.

As global leaders in the provision and deployment of pedestrian wayfinding signage systems throughout the World's major cities, Trueform were the obvious choice to bring their expertise to the scheme, and manufacture the wayfinding signage infrastructure throughout Hong Kong.

Installation commenced in Tsim Sha Tsui, one of Hong Kong's most popular tourist areas, overseen by Trueform's experienced project management team.

12/7/2018

## TRANSPORT FOR GREATER MANCHESTER

Trueform have extensive expertise and experience in the manufacture and install of street furniture products for Transport for Greater Manchester (TfGM).

TfGM awarded Trueform a 12 year contract to manufacture and install up to 800 new platform shelters throughout Manchester's tramway network. Trueform's 'Integra' shelter provided Metrolink with the modular design, high quality appearance and highly engineered construction they were looking for. The shelters have been designed using modular construction techniques and intelligent cable management to facilitate rapid installation.

In addition to this contract, Trueform have also manufactured & installed wayfinding totems for the Greater Manchester area. The totems are located at strategic transport nodes, initially between Piccadilly and Victoria Rail Stations.

## COMMUNITY TRANSIT, SEATTLE

Installed throughout the new Community Transit BRT route, these iconic shelters were manufactured and installed by Trueform, and incorporate the latest engineering and manufacturing techniques, and material innovation.

Trueform collaborated with Community Transit to achieve a unique, branded BRT design that incorporated pioneering use of colour, lighting, signage and specialised manufacturing techniques. Trueform were able to utilize its transit engineering and manufacturing experience to deliver this prestigious project.

The shelters, praised for their attractive design, feature the latest in transport technology, including ticket vending machines, digital information, displays and audio service information.

The Bus Rapid Transit project will improve mobility, connectivity, and accessibility in the area, help spur local economic growth and help changed public perception of passenger transit systems

## NOTTINGHAM EXPRESS TRANSIT

In 2013, Trueform were awarded the contract to manufacture and install a series of advanced tram shelters, platform canopies, ticket vending machines and other platform metalwork, for the second phase extension of the Nottingham Express Transit network.

As a unique and ambitious plan to rejuvenate the local tram network, the Nottingham Express project featured a distinctive product family to meet the city's precise needs. Trueform, the UK's leading experts in shelter and signage fabrications, were awarded the project with the aim to create a high quality, robust solution.

To meet the required specifications, Trueform produced a full suite of detailed engineering drawings, and undertook the manufacture, assembly and installation of over 150 separate assets.

Each product demonstrates the high standards of construction that Trueform is renowned for, utilising the highest grade materials, market leading manufacturing techniques, and an unparalleled attention to detail.

## LUTON AIRPORT WAYFINDING

Trueform were awarded the contract from Luton Airport for Reactive Wayfinding Signage across the entire London Luton Airport Site. The contract is for a bespoke range of directional, informational, highway, statutory & temporary signage. Trueform collaborated closely with the product designer to carry out site surveys, design, manufacture and installation of signage to meet airport, highway, quality and health and safety regulations.

## DUNDEE, SCOTLAND

Designed by Nicholl Russell Studios Architects for Dundee City Council, the distinctive, contemporary Discovery bus shelter was engineered and manufactured by Trueform's bespoke shelter division.

The Discovery bus shelter is available with or without RTPI displays, CCTV, audio PA and interactive information kiosks can be included as an optional extra.

The shelters are manufactured from high-quality robust, vandal-resistant materials. All of the fittings and fixings are tamperproof, and quick release fastenings are incorporated for quick assembly and maintenance.

The modular design is available in a range of configurations and sizes. A choice of high grade material and finish options is offered for long-lasting performance.

A choice of glazing materials and options is also offered, including a shock-absorbing glazing retention system.

Manor Royal Central

METROBUS  
0320

## MANOR ROYAL SUPERHUB

Trueform were awarded the supply and installation of shelters and signage for the Manor Royal Superhub project.

Manor Royal Central is the first planned Superhub. It is a busy westbound bus stop in a highly visible from both directions along Manor Royal road and from Faraday Road.

More than a bus stop, the Superhub is transforming this space into something more inspiring, usable and eye-catching, with a fantastic new bespoke, bigger shelter, public art, new seating and planting.

## BATTERSEA POWER STATION

The extensive redevelopment of London's Battersea Power Station will revamp the iconic Grade II\*-listed power station to its former glory. Across the 42-acre site, the project is turning the power station on the banks of the Thames into a new town centre with shops, restaurants, offices, homes, green spaces and a new tube station in the shadows of the instantly recognisable chimneys.

Fabricated from concrete with laser cut graphics and night time illumination, these totems compliment the area's rich history and help connect visitors with the building's heritage and with rich storytelling.

## BARKING RIVERSIDE

Trueform worked closely with the team at Barking Riverside Limited to help them deliver a brand fit for the scale and ambition of Barking Riverside.

The Thames Clipper service will also create important new links to thousands of jobs across the capital with a service that runs at peak hours Monday to Friday, therefore reliable and up to date real time information was critical for this project.

As such, Trueform worked closely with the client to develop the digital kiosks, which features include:

- High bright 55" outdoor advertising displays
- Real time information for the Thames Clipper
- Local advertising
- Wayfinding mapping

## WEST MIDLANDS MOBILITY HUBS

Trueform were awarded the contract to manufacture and install the UK's first network of mobility hubs as part of a £400,000 project funded by the Department for Transport (DfT).

The year-long project will see three mobility hubs combine transport options including shared bikes, e-scooters and car clubs with public transport and community services to reduce the need for private cars.

Each mobility hub offers bike hire, bike repair and storage, electric vehicle charging, travel information, parcel lockers and social space.

All three mobility hubs will be located in Halesowen town near Birmingham in residential neighbourhoods, shopping areas and transport interchanges. They are designed to fit inside existing parking bays and small public spaces to enable the concept to be scaled in other neighbourhoods.

## FRAMESTORE

Trueform assisted in the development of this custom internal digital directory kiosk which forms part of a wider family of products, for Bafta and Oscar-awarding winning creative studio, Framestore and interdisciplinary design studio, Spaceagency.

Drawing on our significant expertise in the design of indoor and outdoor digital displays, we developed a fully engineered and validated display solution.

Measuring 2.5m in height and with a custom formed internal profile, Trueform fully integrated 2 x 4K 55" screens, incorporating touch screen capability. Bespoke illumination and sound features were also incorporated, and the internal air conditioned envelope was designed in collaboration with independent cooling experts, to ensure 24/7 performance.

## SOUTHAMPTON CRUISE SHIP LOUNGE

As part of plans to transform Southampton Central Station, an international gateway providing ease of access to the Port, cruise terminals and into the City Centre, Trueform have designed, manufactured and installed a new passenger lounge for cruise ship customers and a bus shelter.

The new passenger lounge and bus shelter includes design details such as:

- Internal and external real time passenger information screens
- Bespoke seating and tables
- Floral sedum roof tiles
- Integrated halo lighting
- High-level signage and wayfinding
- Art-deco style banded, curved glazing

## EDINBURGH TRAMS SHELTERS

Trueform manufactured and installed all of the platform shelters, customer seating, signage and litter bins throughout Edinburgh's prestigious tramway extension.
