LONDON UNDERGROUND

Our comprehensive range of signage is fully designed, manufactured and installed in-house, and includes a range of standard display cases and signage, digital and illuminated displays through to bespoke station signage solutions, using materials such as vitreous enamel, aluminium and vinyl.

Over the course of this long running contract, Trueform have successfully manufactured and installed the following products in areas which include concourses, ticket halls and trackside locations:

Trueform's long standing track record of high quality and on-time delivery on this contract, together with Trueform's comprehensive London contract delivery centre and wide range of services, has enabled us to provide the best economic advantage to LUL for the past 25 years.

In addition to display-specific contracts, Trueform have undertaken various other works for LUL / Trams / Crossrail / TfL Rivers contracts involving entrance canopies, platform shelters, help points, real time information, digital service information boards, seating and many more station infrastructures.

MANCHESTER METROLINK

Trueform have extensive expertise and experience in the manufacture and install of street furniture products for Transport for Greater Manchester (TfGM).

TfGM awarded Trueform a 12 year contract to manufacture and install up to 800 new platform shelters throughout Manchester's tramway network. Trueform's 'Integra' shelter provided Metrolink with the modular design, high quality appearance and highly engineered construction they were looking for. The shelters have been designed using modular construction techniques and intelligent cable management to facilitate rapid installation.

GOVIA THAMESLINK RAILWAY

Trueform were selected by GTR in 2016 for the design, manufacture and installation of bespoke passenger waiting shelters at a number of GTR-operated rail stations, including Flitwick, Pevensey Bay, Wivelsfield, Waddon and Kenley.

The works were split across two separate contracts (one contract for Flitwick, one contract for the remaining locations). Trueform worked closely with GTR to design and develop a range of station platform shelters, bespoke to each location.

Each shelter contains integrated features / customer furniture such as seating / perch seating, LED lighting and automatic doors.

THAMESLINK STATIONS

In 2018, Trueform were appointed to design, manufacture and install a variety of signage products for various Thameslink stations, including St. Pancras, London Bridge and Blackfriars stations.

A range of wall mounted, freestanding, suspended and projecting signs were designed, in strict accordance with Thameslink and Network Rail guidelines, and installed across each station following all relevant H&S regulations. The signage was installed station-wide, on concourses, platforms and back-of-house.

Care was taken to ensure only the highest grade materials were used, suitable for a rail environment, and that all signs were validated by independent structural engineers to ensure their safe use in the stations and platforms.

In total, in excess of 500 signs were successfully manufactured and installed, including station name signs, running in signs, route maps, emergency exit signage and much more.

NOTTINGHAM EXPRESS TRANSIT

In 2013, Trueform were awarded the contract to manufacture and install a series of advanced tram shelters, platform canopies, ticket vending machines and other platform metalwork, for the second phase extension of the Nottingham Express Transit network.

As a unique and ambitious plan to rejuvenate the local tram network, the Nottingham Express project featured a distinctive product family to meet the city's precise needs. Trueform, the UK's leading experts in shelter and signage fabrications, were awarded the project with the aim to create a high quality, robust solution.

To meet the required specifications, Trueform produced a full suite of detailed engineering drawings, and undertook the manufacture, assembly and installation of over 150 separate assets.

Each product demonstrates the high standards of construction that Trueform is renowned for, utilising the highest grade materials, market leading manufacturing techniques, and an unparalleled attention to detail.

KING'S CROSS STATION

Trueform's King's Cross Taxi Canopy perfectly combines highly complex design with unrivalled functionality. The intricate glass lattice roofing forms a stunning visual piece, in addition to delivering the leading weatherproof functionality for which Trueform is world renowned.

As one of the busiest transport interchanges in the UK, King's Cross has benefited greatly from a stylish and robust canopy shelter. The elegant canopy has been applauded throughout the industry from providing a valuable addition to the local environment.

In addition to this contract, Trueform have also manufactured & installed digital wayfinding totems throughout the station.

CROSSRAIL / ELIZABETH LINE

Trueform is proud to be an approved supplier for Transport for London (TfL). Our many projects for TfL include a comprehensive range of signage solutions, fully designed, manufactured and installed in-house.

Trueform were awarded the contract to supply signage and shelters for London's newly-constructed Crossrail transport network. This project produced a range of high-quality transport signs, each bearing the TfL logo and style.

London's transport signage has become an iconic part of the city. Trueform understands the world-renowned status of TfL's signs, using only the highest quality fabrications to produce leading signage for TfL's new Crossrail project.

CROYDON TRAMLINK

Trueform were awarded a contract for the design, manufacture and installation of a bespoke tram platform shelter for installation in West Croydon.

The shelter incorporated integrated passenger furniture such as seating and perch seating, along with information / advertising displays, litter bins and signage, and Trueform worked closely with London Trams in the design detailing, ensuring the facility catered for all passenger requirements.

As well as the shelter itself, the contract also included for the manufacture and installation of the galvanised mesh fencing (positioned directly behind the shelter), along with free standing information display cases.

The shelter was ordered as part of a wider contract involving activities such as shelter installation / maintenance, and the provision of signage and street furniture.

NORTHERN RAIL

Trueform were commissioned to undertake the complete product design, manufacture and installation of a 4 Bay Enclosed Bus Shelter for Cramlington Station.

Our premium Flight shelter was selected as the ideal choice Northern Rail. The shelter was constructed from Stainless Steel, with toughened glazing and integrated lighting. Designed specifically for the rail environment, the shelter was constructed to strict structural criteria, to ensure it was suitable for high speed rail platforms.

Key features incorporated within the shelter which significantly enhanced public realm and passenger facilities include our 6-sheet double sided illuminated advertising panel, 38" TFT screen displaying real time information, weather and general news, 3 person perch seat and our popular 2 person seat with arm rest.

On successful completion of the shelter, Northern Rail selected Trueform to supply and delivery over 150no. 2, 3 and 4 person seats, all manufactured and delivered from our dedicated manufacturing facility in West London.

SOCIAL VALUE

Trueform are a leading ESG company (Environmental, Social and Governance). Trueform's green street infrastructure products assist organisations achieve ESG - the three central factors in measuring sustainability and societal impact. Trueform work with clients to transform cities, providing solutions that deliver a promising and sustainable future. We are delighted to be supporting local communities to improve economic, social and environmental wellbeing through city and town centre enhancements and engagement.

Our management team leads by example: promoting active travel, enhancing health, reducing environmental impact and improving overall quality of life.

We innovate to bring new and enhancing sustainably designed products, improve technology, practices in manufacture and maintenance, evaluating and reviewing constantly.

We have enacted environment plans to achieve Net Zero, actively support local economies, provide training and education and ensure inclusivity.

We support communities through our corporate partnerships, local charities and wider volunteering initiatives including our corporate partnerships with Campaign for Better Transport, ComoUK, The Bumblebee Conservation Trust, The Woodland Trust and Crisis.
